SECTION 7 — NARRATIVE

On Monday June 29, 2026 at approximately 08:03 hrs, this officer was dispatched to the intersection of NW 27th Avenue and NW 54th Street in Miami on report of a head-on collision with multiple injuries. Heavy rain was falling with visibility reduced to approximately 200 feet. Significant standing water was present on the roadway. V2 (2020 Honda Civic, Gonzalez) was traveling northbound on NW 27th Avenue in the correct lane. V1 (2019 Ford F-150, Dubois) entered NW 27th Avenue from NW 54th Street traveling southbound — i.e., wrong way in the northbound lane — and collided head-on with V2 at the intersection. The force of impact was severe; both vehicles rotated and came to rest in the intersection. V1 slid laterally and struck the traffic signal controller cabinet on the northwest corner post-collision. Witnesses Esperanza Vega and Thomas Kellerman were positioned on opposite sides of the intersection and independently confirmed V1 was traveling the wrong direction on NW 27th Avenue. Passing motorist Darren Phillips, approaching from the south, stated he observed V1 swerving erratically in the wrong lane for approximately two blocks prior to the intersection. At the scene, Driver Dubois exhibited indicators consistent with alcohol impairment: slurred speech, disorientation, and strong odor of alcohol. Field sobriety evaluation was performed. Chemical test requested and pending results. V2 passenger Rosa Gonzalez was found unresponsive in the rear passenger seat with head trauma and a suspected spinal injury. Miami Fire Rescue Medic 2 transported her to Jackson Memorial Hospital under trauma activation. V2 passenger Luis Gonzalez was conscious but sustained multiple lacerations, a right arm fracture, and airbag burns; he was transported to Jackson Memorial Hospital in serious condition. Driver Gonzalez was transported to Jackson Memorial Hospital with moderate injuries. Driver Dubois sustained minor airbag abrasions and declined transport; he remained at the scene for investigation purposes. Both vehicles are total losses and were removed by South Florida Auto Towing. Miami-Dade DOT was notified of the signal controller damage. In-car camera footage from V2 (dashcam visible) was retrieved and is preserved. Body camera footage is uploading to the case file. A crash reconstruction specialist has been requested due to the severity and DUI implications of this incident.

SECTION 9 — SUPPLEMENTAL INVESTIGATION NOTES

SUPPLEMENTAL — FIELD SOBRIETY AND DUI INVESTIGATION: Driver Antoine R. Dubois was administered the Standardized Field Sobriety Test (SFST) battery at the scene under the supervision of this officer. Results were as follows: Horizontal Gaze Nystagmus (HGN): 6 of 6 clues observed. Walk and Turn: 6 of 8 clues observed; subject was unable to complete heel-to-toe without significant loss of balance. One Leg Stand: Clues at 2, 3, and 4 observed; subject put foot down twice in 30 seconds. Based on SFST results, observed indicators, and subject statements at the scene, probable cause existed for a DUI arrest. Subject was transported to Miami Police Department Central Processing for a blood draw under FL FS §316.1932 implied consent. Chemical test results pending from Miami-Dade Medical Examiner Laboratory, estimated 72-hour turnaround. CRASH RECONSTRUCTION REQUEST: Due to the severity of injuries, total-loss vehicles, and DUI implications, a formal crash reconstruction request was submitted to the Miami PD Traffic Homicide Unit at 09:44 hrs. Case transferred to THU upon notification of V2 passenger Rosa Gonzalez's critical status at Jackson Memorial. This report remains open pending reconstruction findings and chemical test results. VEHICLE DATA RECORDER NOTE: Both V1 and V2 are equipped with Event Data Recorders (EDR). A preservation request has been submitted to prevent overwriting. EDR download is pending court authorization per FL FS §316.0777.
