SECTION 7 — NARRATIVE

On Thursday November 12, 2026 at approximately 06:44 hrs, this officer was dispatched to I-290 westbound at Mile Marker 12.4 in Cook County following a report of a multi-vehicle chain collision with injuries. Conditions at the time consisted of dense fog with visibility estimated at less than 100 feet. The roadway was wet. The incident occurred during morning commute peak hours. V1 (2021 Chevrolet Equinox, Fierro) was traveling westbound in the center lane at an appropriate reduced speed given the fog conditions. V1 braked for slowing traffic ahead and came to a controlled stop. V2 (2018 Ford Fusion, Kwan) was traveling behind V1 and failed to maintain adequate following distance in the reduced-visibility conditions, striking the rear of V1 at moderate speed. V2 had insufficient room to stop and came to rest partially blocking the center lane. V3 (2020 BMW 330i, Owens) was traveling behind V2 and, upon encountering the stationary collision scene in the fog, was unable to stop in time, striking the rear of V2 and pushing it further into V1. The sequence produced a three-vehicle accordion compression. Witness Peter Gallagher was traveling approximately eight car lengths behind V3 and was able to stop safely. He immediately activated hazard lights and called 911. He confirmed that both V2 and V3 were traveling at speeds he estimated as excessive for the prevailing fog conditions. Witness Donna Resko was a passenger in Gallagher's vehicle and corroborated his account. V2 passenger Alicia Kwan reported neck and upper back pain and a facial abrasion from the deployed airbag. She was transported by Chicago Fire Dept. Medic 19 to Rush University Medical Center in stable condition. All three drivers were assessed at the scene and declined transport. V1 was driven from the scene following an inspection confirming drivability. V2 and V3 were towed by Cook County Towing Authority due to structural damage and airbag deployment. Drivers Kwan (V2) and Owens (V3) were both cited under IL 625 ILCS 5/11-710 for Following Too Close. IDOT was notified of minor shoulder barrier contact at Mile Marker 12.4. The Illinois State Police Traffic Crash Report (SR1050) was completed and is attached as Exhibit A to this report. Photographs were taken of all three vehicles, the scene, and the fog conditions and are uploaded to the case file.

SECTION 9 — SUPPLEMENTAL INVESTIGATION NOTES

SUPPLEMENTAL — HIGHWAY FOG CONDITIONS AND IDOT COORDINATION: At the time of the incident, the Illinois DOT digital message board at Mile Marker 15 (three miles east of the scene) displayed "FOG — REDUCE SPEED" in active rotation. This officer confirmed the advisory was active at approximately 07:12 hrs during scene processing. This information is relevant to the question of whether drivers had adequate advance warning of the fog conditions. IDOT emergency operations was contacted at 07:05 hrs. An IDOT incident response unit arrived at 07:31 hrs and coordinated lane closure of the center lane. Traffic was managed by responding officers until lane clearance at approximately 08:15 hrs. VEHICLE DAMAGE ASSESSMENT NOTE: V2 (Ford Fusion, Kwan) is a probable total loss based on compression damage to both the front and rear structural members. The vehicle was sandwiched between V1 and V3 and sustained damage on both ends simultaneously. Insurance carrier notification has been made by Driver Kwan at the scene. FOLLOW-UP ITEMS: (1) Medical update on V2 passenger Alicia Kwan requested from Rush University Medical Center within 48 hours. (2) IDOT message board activation logs for Mile Marker 15 requested for case file. (3) Traffic camera footage from I-290 westbound camera at Exit 12 requested from the Illinois Tollway Authority.
