SECTION 6 — PROPERTY DAMAGE (NON-VEHICLE)

	None.
--	-------

SECTION 7 — NARRATIVE

On Tuesday February 3, 2026 at approximately 18:09 hrs, this officer was dispatched to the intersection of Fifth Avenue and Craig Street in Pittsburgh following a reported two-vehicle T-bone collision with injuries. Conditions at the time were deteriorating: snow was actively falling, the roadway surface was packed snow over ice, and visibility was reduced due to dusk lighting. V2 (2023 Chevrolet Traverse, Porter) was traveling westbound on Fifth Avenue under a green signal phase. V1 (2017 Nissan Altima, MacAllister) was traveling northbound on Craig Street and entered the intersection against a steady red signal, striking the driver-side doors of V2 at significant speed. The side curtain airbags in V2 deployed. Witness Arthur Stefanski, positioned on the northwest sidewalk awaiting a bus, confirmed that V2 had a green signal and that V1 entered on red. He stated V1 did not appear to brake before entering the intersection, which may be attributable to the icy surface. V2 passenger Gregory Porter sustained a suspected right arm fracture and was transported by Pittsburgh EMS Unit 7 to UPMC Presbyterian Hospital in moderate condition. V2 passenger Melissa Porter, a minor age 14, sustained a minor airbag contact burn and was treated on scene; parents declined further transport. Both drivers were uninjured. Both vehicles were towed by Steel City Towing due to extent of damage. Driver MacAllister was cited under PA 75 Pa.C.S. §3112(a)(3). Traffic signal function was confirmed operational by on-scene inspection.

SECTION 8 — OFFICER SIGN-OFF
