SECTION 7 — NARRATIVE

On Wednesday August 19, 2026 at approximately 17:38 hrs, this officer, Det. Esposito (Traffic Safety Unit), and Sgt. Williams were dispatched to Queens Boulevard and 69th Road in Woodside on report of a multi-vehicle collision with pedestrians struck and multiple injuries. A heavy thunderstorm was in progress at the time of the incident with significant ponding on the roadway. The incident occurred during peak evening commute hours. Pedestrians Marcus Douglas and Anya Petrov were crossing Queens Boulevard northbound on the marked crosswalk at 69th Road with the pedestrian WALK signal active. V1 (2021 Nissan Altima, Castillo) was traveling northbound on Queens Boulevard and entered the intersection on a red signal at an estimated speed of 45–50 mph in the posted 30 mph zone. V1 struck pedestrian Douglas at the centerline of the crosswalk, applying full-frontal impact. Petrov was struck by V1's right side mirror and ejected debris as V1 continued through the crosswalk. V1's airbag deployed upon the pedestrian impact. V1 then entered the intersection proper and struck the left front of V2 (2020 Toyota Sienna, Kim), which was legally crossing on green from 69th Road. The impact to V2 was severe; multiple airbags deployed and the vehicle rotated 180 degrees. V3 (2018 Honda CR-V, Ahmed) was traveling behind V2 and, now confronting the stopped and rotated V2 blocking the intersection, struck V2's rear. V4 (2023 Chevrolet Tahoe, Okafor) was behind V3 and struck V3's rear in a secondary chain reaction. Off-duty NYPD Officer T. Park was present as a pedestrian at the northwest corner of the intersection and immediately provided emergency first aid to pedestrian Douglas following the strike. Officer Park applied direct pressure to leg wounds and maintained airway until FDNY EMS Unit 44 arrived. Officer Park's timely intervention is noted in this report. Witness Calvin Moore was in the crosswalk parallel to the victims and narrowly avoided being struck; he confirmed V1 was traveling at high speed and made no visible effort to brake prior to the red signal. Witness Maria Santos provided mobile phone video (47 seconds, beginning approximately 3 seconds before impact) which has been transferred to Det. Esposito under Evidence Reference EV-8814-A. Store owner David Lowenstein secured his store's security camera hard drive under the direction of Det. Esposito; footage covers the full intersection (Evidence Reference EV-8814-B). Pedestrian Marcus Douglas was transported in critical condition to Elmhurst Hospital Center with pelvic fracture, multiple lower extremity fractures, and loss of consciousness. Pedestrian Anya Petrov was transported in stable condition. V2 passenger Mi-Rae Kim was transported with arm fracture and facial lacerations. V2 passenger Jason Kim, age 13, was transported with cervical strain. V2 passenger Soo-Jin Kim, age 9 (child seat deformed), was transported to Children's Hospital at Montefiore as a precaution. V3 passenger Fatima Ahmed declined transport after EMS evaluation. Driver Castillo was assessed and arrested at the scene pending further investigation. Drivers Kim, Ahmed, and Okafor were uninjured.

SECTION 9 — SUPPLEMENTAL INVESTIGATION NOTES

SUPPLEMENTAL — CRIMINAL INVESTIGATION AND ARREST: Driver Roberto E. Castillo was placed under arrest at the scene at 18:22 hrs by Det. R. Esposito, Traffic Safety Unit. Castillo was charged with: (1) Reckless Driving, NY VTL §1212; (2) Reckless Endangerment 1st Degree, NY Penal Law §120.25; (3) Assault 2nd Degree, NY Penal Law §120.05 (serious physical injury to pedestrian). Additional charges may follow pending the condition of pedestrian Marcus Douglas. Castillo was transported to the 108th Precinct for processing. At the scene, Castillo exhibited no signs of impairment; he stated he did not see the red signal due to the heavy rain on his windshield. Windshield wiper inspection at the scene showed significant blade deterioration on the driver side. No chemical test was requested as no impairment was indicated. **VEHICLE SPEED ESTIMATE:** Det. Esposito requested an emergency EDR download for V1. EDR data (if available and preserved) will be submitted to the NYPD Collision Investigation Squad for analysis. Preliminary impact force assessment by this officer, based on pedestrian ejection distance and V1 airbag deployment characteristics, is consistent with a pre-impact speed of 40–55 mph in a 30 mph zone. **CHILD SAFETY SEAT:** Soo-Jin Kim (age 9, V2) was in a booster seat that sustained structural deformation. Replacement was recommended per NHTSA protocol; resource sheet provided to Kim family. **NYPD COLLISION INVESTIGATION SQUAD (CIS):** Per NYPD Patrol Guide §212-57, any collision resulting in critical injury to a pedestrian requires referral to the CIS. This case was formally referred at 18:45 hrs. CIS Det. Vasquez #7741 assumed investigative lead. This report is supplemental to CIS Case #CIS-2026-0819-QN-441.
