SECTION 7 — NARRATIVE

On Saturday January 17, 2026 at approximately 06:29 hrs, this officer, Sgt. Deluca, Illinois State Police Trooper Stacey, and IDOT Emergency Response were dispatched to I-94 northbound at Mile Marker 58.1 near Torrence Avenue in Calumet City on report of a multi-vehicle pileup involving a jackknifed semi-truck with multiple serious injuries and a possible air transport request. An ice storm was in progress at the time, with freezing rain accumulating on all road surfaces and creating glare ice conditions. Visibility was estimated at approximately 500 feet. The incident occurred during pre-dawn hours with no natural light. V1 (2021 Nissan Rogue, Hernandez) was traveling northbound in the center lane at a cautiously reduced speed appropriate for the ice storm. V1 slowed for congestion ahead and came to a controlled near-stop. V2 (2019 Toyota Sienna, Park) was following V1 with insufficient distance for the ice conditions and struck V1's rear at an estimated 45 mph. V2 came to rest blocking the center lane. V3 (2022 Hyundai Santa Fe, Russo) struck V2's rear with significant force; both front and rear of V3 were engaged in the sandwich. V4 (2020 Ford Mustang, Bell) struck V3's rear at a speed witness Garfield estimated as the highest in the chain — Bell's vehicle had not visibly reduced speed approaching the pileup on the ice. V4 struck V3, ricocheted left, and struck the jersey barrier. V5 (2018 Chevrolet Equinox, Dixon) struck V3's rear at a reduced speed after emergency braking. V6 (2023 Ram 2500, Yamamoto) made contact with V5's rear at low speed, adding the sixth vehicle. The semi (2017 Kenworth T680, operator Kowalski — Apex Logistics Inc., USDOT #3044882) was approaching the pileup at an estimated 60 mph. Kowalski applied brakes at the point the collision lights became visible but the glare ice prevented effective braking. The tractor jackknifed; the 53-foot flatbed trailer rotated approximately 80 degrees, striking the jersey barrier and extending into the left and center lanes. The tractor cab collided with the V4-V5 grouping. IDOT Emergency Response confirmed the dynamic message sign at Mile Marker 55.0 had been displaying "ICE STORM — REDUCE SPEED" since 04:12 hrs — over two hours before the collision. Witness Phillip Moore, observing from the Torrence Avenue overpass, reported that the semi's flatbed cargo (steel pipe bundles per cargo placards) shifted during the jackknife, with several bundles displacing toward the left shoulder. IDOT hazardous cargo assessment was requested and Cook County Emergency Services was notified. V2 passenger Ji-Yeon Park was found unresponsive with life-threatening head trauma, rib fractures, and airbag burns. Air One helicopter was requested by CCFD Medic 1 at 06:38 hrs and landed on the I-94 shoulder at MM 57.8. Ji-Yeon Park was transported to Northwestern Memorial Hospital Trauma Center. V2 passenger Hannah Park, age 11 (suspected C6 cervical fracture), was transported to Lurie Children's Hospital. V2 passenger Thomas Park, age 8 (child seat deformed), was transported to Lurie Children's Hospital in stable condition. V3 passenger Marie Russo was transported with bilateral leg contusions. V4 passenger Destiny Bell was transported in critical condition to Advocate Christ Medical Center with pelvic fracture and head trauma. V3 passenger Connor Russo, age 16 (booster seat intact), was transported in stable condition. V5 passenger Linda Dixon was evaluated on scene and declined transport. CMV operator Kowalski was uninjured. V1 driver Hernandez and V5/V6 drivers were uninjured.

SECTION 9 — SUPPLEMENTAL INVESTIGATION NOTES

SUPPLEMENTAL — SEMI JACKKNIFE AND CARGO INVESTIGATION: V7-Semi (Kenworth T680, Apex Logistics Inc., USDOT #3044882) was placed out of service per FMCSA 49 CFR §396.9. ISP Trooper Stacey and Cook County SO Critical Response performed a joint Level I CMV inspection. Preliminary findings: (1) Steer axle tire tread below minimum spec (0.028 in remaining vs. 0.098 in required) — out of service violation; (2) Trailer brake ABS malfunction light active; (3) Operator Kowalski's ELD showed 10.1 hours on-duty driving in the preceding 12-hour period, within HOS limits. Full CMV inspection report pending. CARGO ASSESSMENT: The flatbed was loaded with steel pipe bundles (total cargo weight: approximately 42,000 lbs). IDOT cargo assessment team confirmed at 08:14 hrs that three bundles partially displaced from the trailer during the jackknife; all were contained within the shoulder and no bundles entered the travel lanes. Cargo re-securement and removal by Apex Logistics maintenance crew completed at 10:22 hrs. AIR ONE TRANSPORT: Air One helicopter N471LL responded from Midway base. LZ established on I-94 NB shoulder MM 57.8 with CCFD and ISP lane control. Ji-Yeon Park transported at 07:04 hrs to Northwestern Memorial. Medical update from Northwestern Trauma: Ji-Yeon Park in ICU with epidural hematoma (surgical intervention at 08:44 hrs); status: critical/post-operative. CHILD PASSENGERS: Hannah Park (V2, age 11, booster seat) — seat deformed; replacement mandatory. Thomas Park (V2, age 8, forward-facing harness) — seat structurally deformed; replacement mandatory. Connor Russo (V3, age 16, booster) — seat intact; replacement recommended. Resource sheets provided. I-94 CLOSURE: Full NB closure at Exit 56 from 06:44 to 11:38 hrs. IDOT coordinated diversion to IL-394 northbound. TIM log and DMS activation records attached as Exhibits A and B.
